PROFESSIONAL SUMMARY

U.S. Navy veteran and Computer Information Systems student specializing in cybersecurity (expected graduation December 2026). Hands-on academic experience in digital forensics, evidence verification, Python, machine learning, and virtualized environments. Background in technical troubleshooting, documentation, and team leadership in mission-critical settings. Seeking entry-level cybersecurity, digital forensics, or IT opportunities.

TECHNICAL SKILLS

Security & Forensics: Digital evidence acquisition, hashing and verification, chain of custody, vulnerability analysis, MITRE ATT&CK, CVE/CVSS, Wireshark, Nmap

Programming & Data: Python, Java, SQL/MySQL, HTML/CSS, scikit-learn, pandas, RapidMiner, Microsoft Access, Excel

Systems & Networking: Windows, Windows Server, Linux (Kali/Ubuntu), VMware, VirtualBox, TCP/IP, DNS, VPNs, firewalls, troubleshooting

SELECTED TECHNICAL PROJECTS

AI-Powered Cybersecurity Defense | CIS 490

- Explored machine learning methods for cybersecurity vulnerability and threat analysis using Python, CVE/CVSS data, and MITRE ATT&CK; documented model evaluation in Jupyter notebooks.

Project Phoenix | Digital Forensics Investigation

- Conducted an academic investigation involving evidence identification, acquisition, hash verification, analysis, and documentation of findings.

Windows 11 Digital Forensics & VMware Lab

- Configured a Windows 11 virtual machine; performed write-protection testing and documented evidence-handling procedures.

Customer Churn Analysis | RapidMiner

- Built and evaluated a decision-tree classification workflow using data preparation, model application, and performance evaluation.

PROFESSIONAL EXPERIENCE

United States Navy | Gas Turbine Systems Technician – Electrical (GSE3) | Pearl Harbor, HI | Jul 2017 – Jun 2021

- Maintained, inspected, diagnosed, and repaired electrical and electronic systems supporting gas turbine propulsion aboard USS Hopper (DDG-70).
- Used technical diagrams, test equipment, and maintenance procedures to troubleshoot faults and document corrective actions; supported 5,000+ hours of equipment maintenance.
- Managed billeting operations for 193 beds and 175 tenants; coordinated 56 maintenance requests and supervised 4 sailors and 8 contractors.
- Earned early promotion by ship leadership; supported operational readiness in a safety-critical environment.

EDUCATION

Colorado State University Pueblo | B.S., Computer Information Systems – Cybersecurity Emphasis | Expected Dec 2026
San Bernardino Valley College | A.S., Management Information Systems | 2023
California State University, San Bernardino | Information Technology coursework | Jan–May 2024

ADDITIONAL INFORMATION

Previously held U.S. Secret security clearance (expired June 2023).
