PROFESSIONAL SUMMARY

U.S. Navy veteran and Computer Information Systems student at Colorado State University Pueblo, pursuing a B.S. with a Cybersecurity emphasis (expected December 2026). Hands-on academic experience in digital forensics, evidence handling, Python programming, machine learning, web development, and virtualized environments. Four years of military experience in technical troubleshooting, maintenance documentation, operational readiness, and team leadership. Seeking entry-level cybersecurity, IT, digital forensics, and related technical opportunities.

TECHNICAL SKILLS

Security & Forensics: Digital evidence identification and acquisition, hashing and verification, chain of custody, forensic documentation, vulnerability analysis, MITRE ATT&CK, CVE/CVSS, Wireshark, Nmap, FTK Imager, HxD.

Programming & Web: Python, Java, SQL/MySQL, HTML5, CSS3, responsive web design, GitHub, GitHub Pages, Matplotlib.

Data & AI: Data analysis, decision-tree classification, RapidMiner, pandas, scikit-learn, machine learning concepts, Jupyter notebooks, Microsoft Excel and Access.

Systems & Networking: Windows 11, Windows Server, Linux (Kali/Ubuntu), VMware, VirtualBox, TCP/IP, DNS, VPNs, firewalls, computer hardware, technical troubleshooting.

SELECTED TECHNICAL PROJECTS

AI-Powered Cybersecurity Defense | CIS 490 (Jan–May 2026) — Developed and evaluated six AI/machine-learning models for cybersecurity-related analysis; explored vulnerability and threat analysis using Python, CVE/CVSS information and MITRE ATT&CK; documented model evaluation in Jupyter notebooks. GitHub: github.com/ConnorBatesCyber/AI-Cybersecurity-Defense

Project Phoenix – Digital Forensics Investigation (Oct 2026) — Conducted a simulated investigation involving evidence identification, preservation, analysis, timeline development, hash verification, chain of custody, and documentation of findings.

Windows 11 Digital Forensics & VMware Lab (Sep 2026) — Built and configured a Windows 11 virtual machine using VMware; tested USB access and write-protection procedures; documented setup, evidence handling, and forensic exercises.

Customer Churn Analysis & Decision Tree Model (Aug 2026) — Prepared customer data, built a decision-tree classification workflow in RapidMiner, applied the model, and evaluated performance to investigate customer churn patterns.

Personal CIS & Cybersecurity Portfolio Website (Sep 2026–Present) — Designed and published a multi-page HTML5/CSS3 website with responsive layouts, navigation, accessible content, and pages for projects, skills, and resume. Live site: connorbatescyber.github.io

Python Programming Projects (Sep 2026–Present) — Completed coursework programs involving conditionals, loops, functions, text processing, input validation, random number simulations, image manipulation, and Matplotlib visualizations.

PROFESSIONAL EXPERIENCE

United States Navy | Gas Turbine Systems Technician – Electrical (GSE3) | Pearl Harbor, HI | Jul 2017 – Jun 2021

• Maintained, inspected, diagnosed, and repaired electrical and electronic systems supporting gas turbine propulsion and auxiliary equipment aboard USS Hopper (DDG-70).

• Used technical schematics, test equipment, and maintenance procedures to troubleshoot faults, document corrective actions, and support more than 5,000 hours of equipment maintenance.

• Managed billeting operations for 193 beds and 175 tenants; coordinated 56 maintenance requests and supervised four sailors and eight contractors.

• Earned early promotion by ship leadership; supported operational readiness, technical documentation, and safety compliance in a mission-critical environment.

EDUCATION

Colorado State University Pueblo | Bachelor of Science, Computer Information Systems – Cybersecurity Emphasis | Expected Dec 2026

San Bernardino Valley College | Associate of Science, Computer Information Technology | Dec 2023 (degree type to verify against diploma)

California State University, San Bernardino | Information Systems and Technology – Cyber Security coursework | Jan–May 2024

ADDITIONAL INFORMATION

Previously held U.S. Secret security clearance (expired June 2023).
